PRE-FIRST

Dear parents:

It is a pleasure to share with you what we have been working with during this school year. As you know, the Science program includes different and attractive topics for the kids.

Now we are preparing a project related to animals, plants, and its habitats. You will soon have more information about this.

Please encourage you kid to practice vocabulary, and ask him/her to tell examples about different living things. Use read life matters to match them with the topics we are working with.

Thank you for your support!!!!

Sincerely
Paola Rodríguez
English Teacher
